- ✓ 100' roll of 1.5" decorative film
- ✓ Microfiber cloth
- ✓ Spray bottle
- ✓ Trowel

1 kit covers
200 square ft.

AVAILABLE FOR ORDER
online at CampingWorld.com

HOW TO INSTALL

- Move furniture away from area
- Remove any wall hangings, treatments, and frames
- Wipe down wall with the microfiber cloth and water to remove any dirt or grease
- Before applying film, lightly mist the wall with water to allow for easy repositioning and film adjustments
- Using your 24” role of film, peel back the release liner approximately 12” and place it in the top corner of the wall, applying vertically.
- Use the trowel to smooth out the film, working from the center and pressing to the edges
- Continue slowly peeling the release liner back, working in small sections
- Trim the film once the section is complete
- If you have a window in the area, use the frame as a guide to trim the film
- Begin on the next section following the same steps
- Finish by using the 1.5” film to cover seams
- Replace any window frames, wall treatments, and furniture.

Helpful Hints

DON’T use any citrus based cleaners or Goo-Gone before applying new film

DO tape the outdoor window before removing frame

DO take your time applying film
